

# Diary Of A MAD List Builder and INSANE Traffic Generator

In this diary I'm going to reveal to you the results I've been receiving so far using a **yet to be release software program** that is in my mind quickly becoming one of the most powerful tools I've ever had in my marketing toolbox.

The program I'm talking about is called "**Stephen Pierce's SmartOPTINPages**" and it's already producing the fastest and most mind-numbing results I've ever seen in my online business to date.

Just the thought of generating free laser targeted organic search engine traffic that effortlessly turns into pre-qualified optin subscribers and paying customers is enough to make your head spin in amazement.

Now that there's actually a program that does just that is something so amazing I can't even put it in to words!

So, I've decided to put this little "Diary" together showing you the actual results this up coming program is actually producing in a Real-Life market test.

This is what I've done...

**I picked a market that is some what hard to get and keep good listings with,** a market that has HUGE competition and is almost impossible to dominate using normal marketing and list building methods.

The market I chose is Resumes!

I used the up coming **SmartOPTINPages** software and upload a set of exclusive optimized pages and let the system do the rest.

Below are the results I've had so far.

**This Information Is Mind Blowing So  
Pay Close Attention and Read Every Word  
Below So You Don't Miss A Single Thing**

## - SmartOPTINPages Results Diary -

---

**Start Date:** 07/19/2005

**Topic:** Resumes

**Domain:** www.job-finding-resources.com/resumeinfo/

### **2 Days After Uploading (07/21/2005)...**

Just two days after making, uploading and using a simple hands-free blog and ping method, there are already over 50 pages listed and indexed in Yahoo.

The program only makes 200 pages. 200 specially optimized pages based on collecting targeted optins and in only two days I already have a quarter of the pages indexed.

The interesting thing here though is that some of these pages are already getting top rankings. Not just first page rankings. I'm talking about #1 rankings for highly targeted keyword phrases!

Not only #1 rankings though, optins are already starting to come in as well. The amazing thing is that it's only been two days and the results are already showing to be better than any other program I've ever used.

**Side Note:** One thing to consider here is the fact that the topic being used (resumes), is a very hard topic to get good listings in. The market is saturated with SEO funnels sites, affiliate marketer sites and other AdSense type sites not to mention the actual content and product based sites on resumes.

So far today (just two days after uploading), I've already received almost a hundred target visitors and seven pre-qualified optin subscribers.

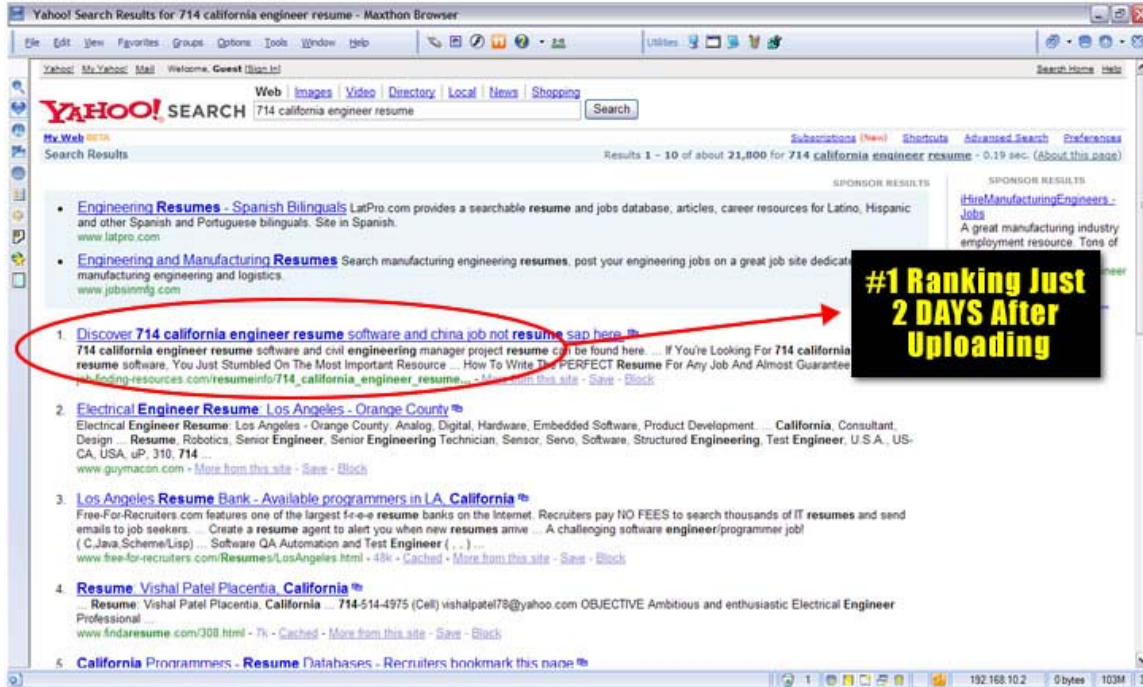

**SmartOPTINPages is more than just software,  
it's a complete system for quietly entering,  
penetrating and dominating niche after niche  
after niche over and over again.**

**It's the ultimate list building system and traffic  
generating system build into one complete program**

**#5 Ranking Just 2 DAYS After Uploading**

**Date:** 07/23/2005

**Topic:** Resumes

**Domain:** www.job-finding-resources.com/resumeinfo/

## **4 Days After Uploading (07/23/2005)...**

Now 4 days after uploading the SmartOPTINPages on resumes my listings are still holding strong.

I've still got top rankings on the same keywords, and some have even moved up to higher positions in the Yahoo search engine.

This is amazing!

There are a ton of other traffic generation programs out there and none of them have shown to get pages indexed this fast with the high positions that **Stephen Pierce's SmartOPTINPages** are generating.

- Traffic Equalizer
- Directory Generator
- SmartPages (original release from 2002)
- Traffic Hurricane
- And More

None of these programs have shown anything even close to the results the SmartOPTINPages are producing.

Don't get me wrong, I love the programs listed above and I even use some of them still to this date, and will continue to use them because those programs generate pages used for a completely different goal, but the fact is the SmartOPTINPages are pumping out lightning fast and ever growing results!

Over the past two days (now 4 days after uploading), I've gotten even more pages indexed into Yahoo's search engine and my traffic has picked up. Only 4 days have gone by and I've already generated over 400 targeted visitors and 19 optin subscribers.

### **Now Here's Something Amazing!**

I've also already seen 2 sales from the optins I've received from my **Stephen Pierce's SmartOPTINPages**.

That may not seem like a lot to you, but that's after only 4 days of being online and without doing any marketing at all! **NONE!**

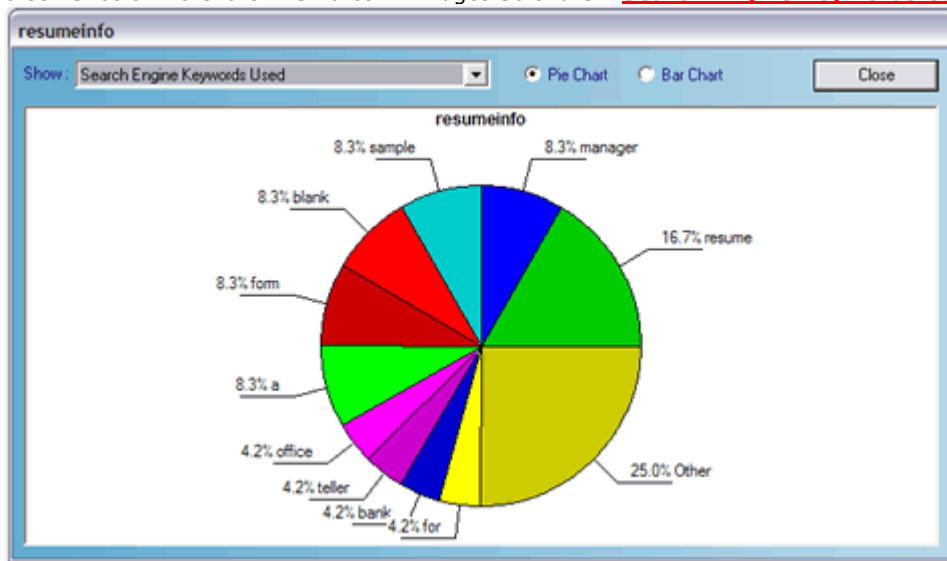

As for the people who have opted in and not purchased so far, they're now on a targeted list and I will see more of them becoming customers in time through targeted email marketing where as **if I didn't use the SmartOPTINPages program, I'd be literally throwing all of these possible profits right out the window.**

This is already starting to look more and more like something that Stephen should be keeping under his hat because it's looking to be so effective.

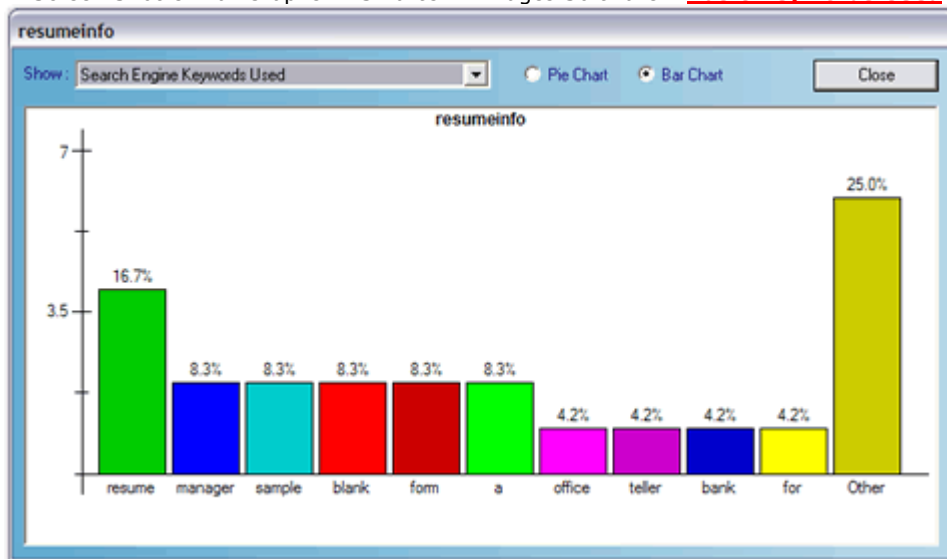

**Imagine how many targeted visitors, subscribers and more importantly...sales, that will potentially be generated over the coming days, weeks and even years!**

**Domain:** www.job-finding-resources.com/resumeinfo/

## 7 Days After Uploading (07/26/2005)...

**WOW!**

It's only been 7 days after making, uploading and starting the indexing process of these resume SmartOPTINPages and things are looking AMAZING!

I got another sale from one of the optins generated by the SmartOPTINPages!

I have a total of 36 optins so far and 3 sales.

**That's just about a 10% conversion rate from optin to customer!**

How many other programs out there can say they've produced a 10% optin to customer rate ...from free organic search traffic!

I've even gotten more pages indexed and had some of the listings move up to higher rankings again...

The results I've been seeing from just two days after upload all the way up till now are the same results most others start to see after weeks of waiting. **It's amazing how fast the SmartOPTINPages are getting into the search engines and producing targeted optin subscribers.**

So far, I've gotten over 140+ pages listed in Yahoo and a steady flow of targeted visitors and the optins are coming in more and more everyday.

It's amazing how this "Set it and forget it" system literally sucks in laser targeted visitors and builds niche lists on an almost effortless, auto-pilot platform.

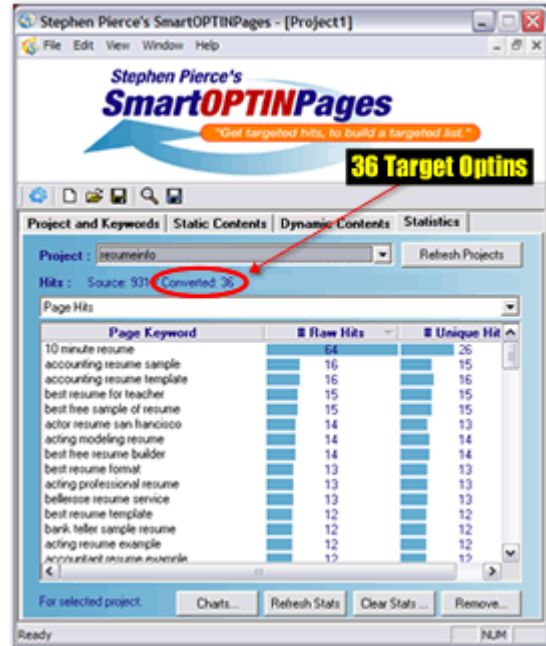

I can see pay-per-click costs going down all over the internet because of Stephen Pierce's SmartOPTINPages.

**So far, in only 7 days after uploading and indexing the pages I have already generated over 900+ visitors and 36 optins.** And it keeps coming, growing little by little everyday.

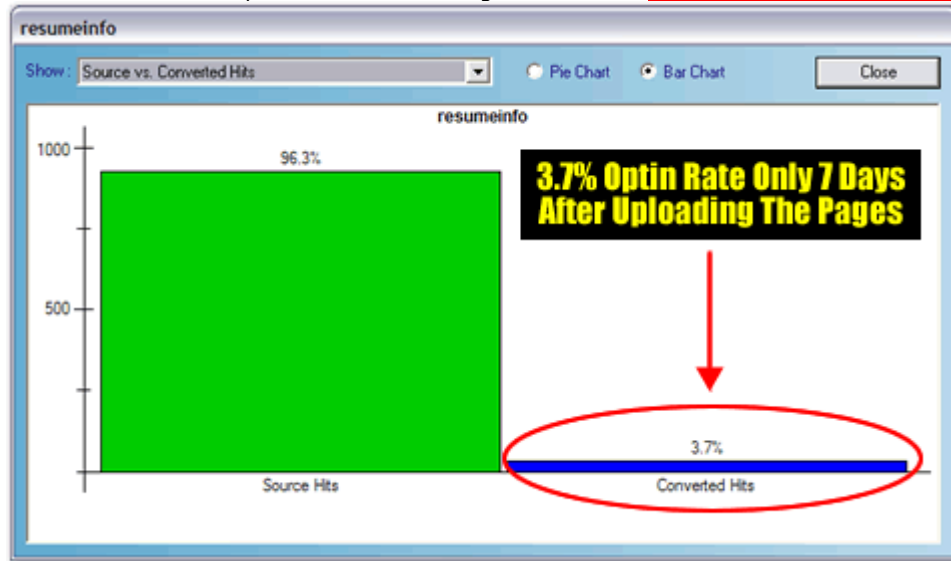

It's mind blowing how effective this really is!

I can say that I'm incredibly happy with the optin rate I've received so far considering all of the other results I've seen with the generated traffic.

Screen Shot Of SmartOPTINPages Software Stats

Screen Shot Of Bar Graphs In SmartOPTINPages Software – **Total Hits To Converted Hits**

So, I'm going to make a few little changes to the pages.

Change the headline maybe, change the wording in the content of the pages and maybe even some of the bullets.

**This is one of the most amazing things about Stephen Pierce's SmartOPTINPages program!**

You can easily and quickly make any needed changes to your pages and upload them right from the program itself in just minutes.

**This means you're in complete control over the success or failure of your optin pages generated by the SmartOPTINPages program.**

You can even make a few simple little changes to the template itself and have completely different looking pages if you'd like!

**SIDE NOTE:** SmartOPTINPages is going to be the answer most niche marketers and affiliate marketers have been looking for online for years now. Both traffic generation and laser targeted optin list building all wrapped in to one simple and almost hands-free software program!

Profits around the world online are going to start growing more and more as more people use SmartOPTINPages.

---

## Conclusion:

**After only seven days online my SmartOPTINPages have already generated 900+ targeted visitors, 36 pre-qualified optin subscribers and three sales I would have not gotten other wise.**

The up coming release of **Stephen Pierce's SmartOPTINPages** program is going to lead to major up swings in the marketing field and bigger and better profits worldwide for both the affiliate marketer and the niche marketer alike.

I'll have a few more diary entries for you in the next week or so and I've even started a new diary for a second test in a different niche market!
