## - Results You Can Base Your Business On -

The last thing in the world I thought when I started doing these tests was that I would have actually stumbled across something that delivered like it was supposed to.

Don't get me wrong. Most other systems and programs online do deliver...to a degree!

But from what I've seen so far **Stephen Pierce's SmartOPTINPages** program is the one and the only one that actually delivers over and over and over again.

And the effort put into creating pages and getting them listed in the engines has been almost completely effortless!

I'm more than pleased with the results I've received so far and I can honestly say I KNOW any smart marketer would be just as pleased as I am, if not more.

What I've done here is combined the results I've seen to date for both the 'Resume' market test and the 'Bedwetting' market test so you can see how amazing the SmartOPTINPages program and system really is.

**The results produced from using the SmartOPTINPages software are just AMAMZING!**

**Topics:** Resume & Bedwetting

**Domain:** www.job-finding-resources.com/resumeinfo/ & www.secretstostopbedwetting.com

## Result To Date (08/10/05) ...

It's now been over two weeks that I've had these two test sites up and let me tell ya, I'm still amazed.

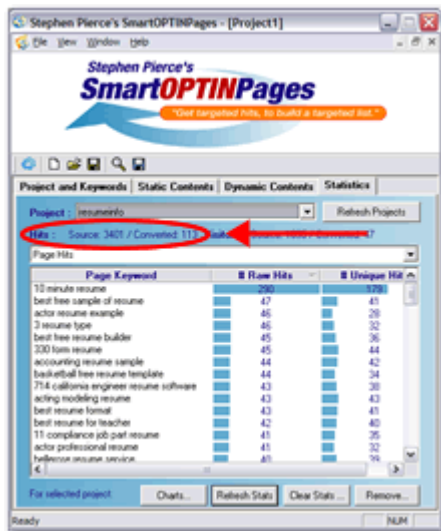

The longer the pages are up and online the better they seem to be doing. This is something new that most other traffic generation programs just don't deliver.

To date, I've had over six thousand visitors to both sites and received over 230+ pre-qualified optin subscribers.

**Do you know how amazing that is!!!**

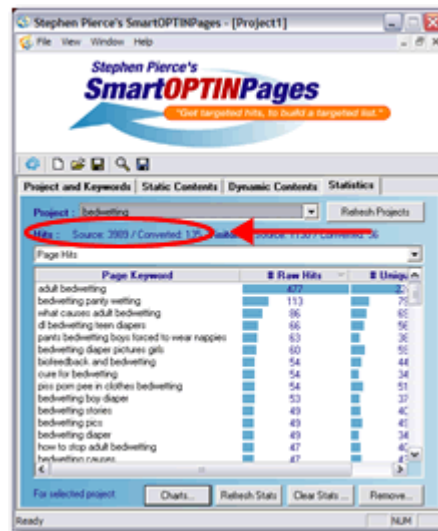

**Over 6,000 visitors in just about two weeks and over 230+ QUALITY TARGETED optin subscribers** and all with out lifting a single finger after I created the pages and uploaded them.

And more visitors and optins are coming in daily.

**Resume:**  
Just over two weeks online

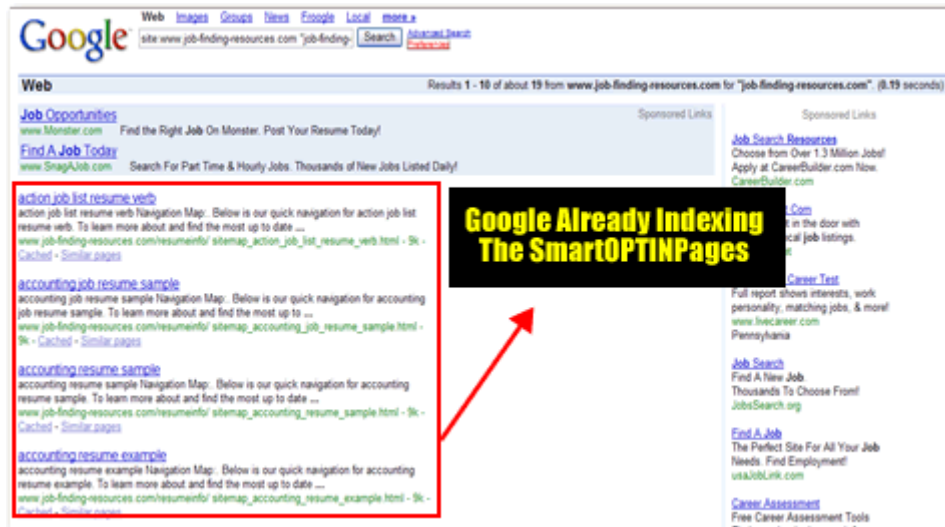

Total Visitors = 3401  
Total Optins = 113

**Bedwetting:**  
Only two weeks online

Total Visitors = 3989  
Total Optins = 135

Still getting visitors, still getting optins, still have top rankings for both sites and now that the pages have been up for a bit and the search engine robots have been doing their job, Google is starting to pay attention to the as well.

**SIDE NOTE:** Keep in mind that when I started getting these sites indexed, I didn't use or do all of the things I know work to get them indexed. I wanted to see how easy the SmartOPTINPages were to get in the engines (and I know now they are easy to get in), so I only did the bare basics needed to get indexed.

If I would have used all of the tools, know-how and resources at my finger tips the results would have been 200 time better than they now, the results I have now are VERY IMPRESSIVE!

Okay, the visitors are coming in and the optins are coming, but how do you know what pages are working better than others, what keywords are being used the most and all of the other info we need to know and have ready for us?

Well, I haven't talked much about the stats feature in SmartOPTINPages in these dairies so I think I should let you in on the stats stuff really quick here.

Now this is REALLY cool and the info you get is priceless at the same time.

We all know how important tracking is to our business! And with most other programs and software applications you have to setup separate tracking and stats system to keep track of things.

Not with Stephen Pierces' SmartOPTINPages software!

This one thing blew my mind when I saw it...

The software has full stats built right into the desktop program itself. You don't have to open you browser to do anything except setup your main database and that's it.

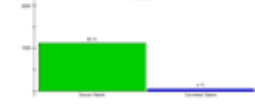

You get to see all of the info you need to help make the best business decisions you possibly can in your niche businesses.

1. Keyword Page Creation
2. Targeted organic Search Engine Traffic
3. Pre-qualified Optin Subscribers
4. Full tracking and stats

**How many programs out there do you know of that do all of this** all in one full featured desktop application where you don't ever have to use any other tools (except your autoresponder and hosting account).

Now, even though it's a bit over two weeks since I made and uploaded my two test sites, they're still kick'in butt in Yahoo's search index.

It really is amazing how the pages made with the SmartOPTINPages software are getting into the engines, and STAYING IN THE ENGINES!

For years now people have been struggling to learn how to do just this and along comes this one piece of software that literally does it for you.

Stephen Pierces' SmartOPTINPages are going to upset a LOT of SEO companies and I can see the SEO forums blowing up with posts on how great this software is. Not to mention how easy it is to use.

I'm gonna make sure SmartOPTINPages are a MAJOR tool in all of my future marketing and I'm even gonna start setting up sites using the software for some of my current products online.

## Conclusion:

**Now just over two weeks after making and uploading with the SmartOPTINPages software I've received over 6,000+ targeted visitors, Over 230+ pre-qualified optin subscribers and they're still coming in like clockwork!**

**Smart marketers and eBusiness owners are gonna jump at the chance to get their hands on this software.**

I mean, with only 1,000 copies available (no exceptions), **you'd be a fool not to get a copy of the SmartOPTINPages software right away!**
